EDUCATION

Ph.D. Engineering Science *Sept. 2015–Apr. 2022*
Simon Fraser University, Canada

- Dissertation: Machine Learning for Classifying Anomalies and Intrusions in Communication Networks
  Keywords: Cybersecurity, machine learning, communication networks, software development

M.Eng.Sc. (thesis-based) Electrical and Electronic Engineering *Feb. 2013–Sept. 2015*
University College Cork, Ireland

M.Eng.Sc. (course-based) Microelectronic Engineering *Sept. 2011–Feb. 2013*
University College Cork, Ireland

B.E. (Hons.) Electrical and Electronic Engineering *Sept. 2009–Sept. 2011*
University College Cork, Ireland

B.E. Microelectronics *Sept. 2007–Sept. 2009*
Guilin University of Electronic Technology, China

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, MySQL, JavaScript, Octave, C#, LaTeX

Machine Learning Libraries and Data Science Tools: PyTorch, Keras, Scikit-learn, NumPy, SciPy, Pandas, Matplotlib, Google Colab, Weka

Web Application Development: Flask, AWS Elastic Beanstalk

Certification: Cisco Certified Network Associate (CCNA)

RESEARCH AND WORK EXPERIENCE

Assistant Professor *Jan. 2023–Present*
Department of Computer Science, New York Institute of Technology Vancouver, BC

- **Full-time faculty member for the Master of Science in Cybersecurity (M.S.-Cybersecurity) Program**
  - Core courses: **CSCI 651 Algorithm Concepts** (design, analysis, and complexity considerations); **INCS 615** Advanced Network and Internet Security; **INCS 775** Data Center Security; **INCS 870** Project I
  - Prerequisite course: **CSCI 503** Computer Organization and Architecture
  - Elective course: **CSCI 690** Computer Networks
- **Curriculum Development for Online Education**
  - **CSCI 760** Database Systems, **CSCI 651** Algorithm Concepts, **CSCI 621** Programming Languages
- **Research Involvement**
  - **Network intrusion detection systems** (NIDS): Developing a real-time machine learning (ML) system for the detection of network anomalies; Focusing on **computationally efficient** and **complexity-aware** learning algorithms for cybersecurity applications

- **Blockchain**: Building a real-time, multi-layer Ethereum phishing dataset; Designing ML models for transaction risk detection based on phishing and victim behaviors; Developing and securing a browser extension to alert users of suspicious blockchain interactions
- **Brain-computer interfaces** (BCI): Analyzing electroencephalogram (EEG) signals and developing ML classification models for BCI data

Postdoctoral Fellow *June 2022–Dec. 2022*
Faculty of Applied Sciences, Simon Fraser University Burnaby, BC

- Led a research initiative on developing novel machine learning algorithms based on echo state networks
- Explored applications of graph neural networks based on network topologies

Research Assistant *(Advisor: Prof. Ljiljana Trajković)* *Sept. 2015–Apr. 2022*
Faculty of Applied Sciences, Simon Fraser University Burnaby, BC

- **Applications of Machine Learning Techniques for Classifying Network Anomalies**
  - Processed the raw network data: BGP data from RIPE and Route Views
  - Analyzed and implemented various ML algorithms as well as employing feature selection
  - Performed experiments (cross-validation and testing) using a supercomputer managed by Compute Canada
- **Development of Novel Machine Learning Algorithms: VFBLS, VCFBLS**
  - Developed two fast BLS-based algorithms: variable features BLS algorithms without and with cascades
  - Developed generalized models based on various subsets of input data based on selected features and expanded the network structure
- **Development of Tool for Detecting Network Anomalies: BGPGuard**
  - The tool consists of multiple modules: real-time data retrieval, feature extraction, label refinement, data partition, data processing, ML algorithms, parameter selection, ML models, and classification
  - Integrated various stages of the anomaly detection process
  - Detected BGP anomalies based on routing records collected worldwide from major Internet exchange points
  - Facilitated creating new machine learning models based on historical BGP anomalous events

Teaching Assistant *Sept. 2015–Apr. 2022*
Faculty of Applied Sciences, Simon Fraser University Burnaby, BC

- **ENSC 427/894 Communication Networks**, 6 terms (undergraduate and graduate levels)
- **ENSC 220 Electric Circuits I**, 4 terms (undergraduate level)
- **ENSC 120 Introduction to Electronics Laboratory Instruments Operation and Measurement Techniques**, 2 terms (undergraduate level)
- **ENSC 252 Fundamentals of Digital Logic and Design**, 2 terms (undergraduate level)
- **ENSC 180 Introduction to Engineering Analysis**, 1 term (undergraduate level)

Data Analyst | Part-time *May 2021–Sept. 2021*
EVO-IN-MOTION Technology Richmond, BC

- Analyzed data from circuit simulations and experiments

Teaching Assistant *June 12, 2021*
IEEE SMC Society Summer School Tokyo, Japan (virtual)

- TA for Lecture 4: Data mining and machine learning for detecting traffic anomalies and intrusions
- Designed and presented a demo of anomaly detection (Slammer worm) with Python on Colab

Research Assistant *(Advisor: Prof. Peter Kennedy)* *Oct. 2011–Jan. 2015*
Tyndall National Institute Cork, Ireland

- Designed nonlinearity-tolerant requantizer architectures for fractional-*N* frequency synthesizers

Electrical Engineer | Internship *May 2010–Aug. 2010*
Dell EMC Cork, Ireland

- Supplied details of failure return to the suppliers and involved in customer service

AWARDS

- IEEE Outstanding Leadership Award *Dec. 2022*
  - Publicity Chair of the 2022 IEEE International Conference on Digital Twin as a part of the 2022 IEEE Smart World Congress
- Graduate Fellowship Award, SFU *Fall 2017, Fall 2019*
- Faculty of Applied Sciences Graduate Fellowship Award, SFU *Summer 2016, Fall 2016*
- Travel and Minor Research Award, SFU *Summer 2016*

EXTERNAL SERVICE AND EVIDENCE OF IMPACT

Leading Guest Editor *June 2024–Present*
Electronics: Special Issue on *Enhancing Cybersecurity: Attack Detection and Defense Techniques*

Secretary *Feb. 2022–Present*
Membership Development Committee, IEEE Canada

Secretary *Jan. 2024–Present*
IEEE Vancouver Section

Chair/Treasurer *June 2023–Present/ Jan. 2018–June 2023*
IEEE Circuits and Systems Society joint Chapter of the Vancouver/Victoria Sections

Counselor and **Co-Founder** *July 2023–Present*
IEEE NYIT-Vancouver Student Branch

Chair/Secretary *Sept. 2020–Oct. 2021/ Sept. 2019–Sept. 2020*
IEEE SFU Student Branch

Mentor, Organizer of Hosting Institutes *Apr. 2024, 2025*
Virtual BR41N.IO Hackathon, Spring School 2025 and 2024

- Mentored NYIT team in 2025:
  - Data Analysis Project: *EEG Signal Classification Using Machine Learning*. Explored signal processing and machine learning, and deep learning (LSTM, minGRU)
- Mentored NYIT and NTNU teams in 2024:
  - Data Analysis Projects: Team SpatialTemporal Explorers and Team Brainwave. Focused on EEG analysis, this project aimed to filter noise from EEG data, partition the data, and develop various deep learning models (CNN, GAN) to classify brainwave signals

Jury Member and Mentor, Organizer of Hosting Institutes *Apr. 2023*
Virtual BR41N.IO Hackathon, Spring School 2023

- Assessed various projects: data analysis, gaming, and programming/art
- Mentored NYIT teams:
  - Data Analysis Project: Focused on EEG analysis, this project aimed to filter noise from EEG data, partition the data, and develop various machine learning models to classify brainwave signals

- Gaming Project: Developed using Unity 3D and the Unicorn C# API, this project features a game that leverages P300 signals reflecting the player's attention to specific stimuli to control the music, creating a unique gaming experience

Organizing Committee and Technical Program Committee Membership

- IEEE Canadian Conference on Electrical and Computer Engineering: Posters Co-Chair and Track Chair (*CCECE 2025*)
- IEEE International Conference on Computer, Vision and Intelligent Technology: Workshop Chair (*ICCVIT 2024, 2025*)
- International Conference on Cryptography, Security and Privacy (*CSP 2024, 2025*)
- IEEE International Conference on High Performance Computing and Communications: Member (*HPCC-2022*); Member and Session Chair (*HPCC-2020*)
- IEEE International Conference on Cyber, Physical and Social Computing: Member and Publicity Chair (*CPSCom-2022*); Member and Session Chair (*CPSCom-2020*)
- IEEE International Conference on Parallel and Distributed Systems (*ICPADS 2023*)
- IEEE International Conference on Geoinformation Science and Communication Technology (*GSCT 2025*)
- International Conference on E-Business and Internet: Member (*ICEBI 2022*)

Reviewer for Refereed Journal and Conference Papers

- IEEE Internet of Things Journal (2025); IEEE Communications Magazine (2025); IEEE Journal on Selected Areas in Communications (J-SAC) (*2022*); Computers & Security (*2022)*; IEEE Transactions on Neural Networks and Learning Systems (*2021, 2022)*; Neural Networks (*2020–2022)*; IEEE International Symposium on Circuits and Systems *(2022–2023)*; IEEE International Conference on Systems, Man, and Cybernetics (*2020–2025)*; Concurrency and Computation: Practice and Experience (*2021*); IEEE Transactions on Emerging Topics in Computational Intelligence (*2019, 2021*); IEEE Access (*2019, 2020*)
