Postdoctoral fellow working on cybersecurity: using machine learning to detect network anomalies

EDUCATION

Ph.D. Engineering Science

Sept. 2015–Apr. 2022

Simon Fraser University, Canada

- Dissertation: Machine Learning for Classifying Anomalies and Intrusions in Communication Networks

M.Eng.Sc. (thesis-based) Electrical and Electronic Engineering

Feb. 2013–Sept. 2015

University College Cork, Ireland

M.Eng.Sc. (course-based) Microelectronic Engineering

Sept. 2011–Feb. 2013

University College Cork, Ireland

B.E. (Hons.) Electrical and Electronic Engineering

Sept. 2009–Sept. 2011

University College Cork, Ireland

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, MySQL, JavaScript, Octave, C#, LaTeX

Machine Learning Libraries and Data Science Tools: PyTorch, Keras, Scikit-learn, NumPy, SciPy, Pandas, Matplotlib, Google Colab, Weka

Web Application Development: Flask, AWS Elastic Beanstalk

Certification: Cisco Certified Network Associate (CCNA)

RESEARCH AND WORK EXPERIENCE

Postdoctoral Fellow

June 2022–Present

Faculty of Applied Sciences, Simon Fraser University

Burnaby, BC

- Leading the project for developing new ML algorithms based on echo state networks
- Exploring applications of graph neural networks based on network topology

Research Assistant (Advisor: Prof. Ljiljana Trajković)

Sept. 2015–Apr. 2022

Faculty of Applied Sciences, Simon Fraser University

Burnaby, BC

- **Applications of Machine Learning Techniques for Classifying Network Anomalies**
 - Processed the raw network data: BGP data from RIPE and Route Views
 - Analyzed and implemented various ML algorithms as well as employing feature selection
 - Performed experiments (cross-validation and testing) using a supercomputer managed by Compute Canada
- **Development of Novel Machine Learning Algorithms**
 - Developed two fast BLS-based algorithms: variable features BLS algorithms without (VFBLs) and with cascades (VCFBLs)
 - Developed generalized models based on various subsets of input data based on selected features and expanded the network structure

- **Development of Tool for Detecting Network Anomalies: [CyberDefense](#)**

- The tool consists of multiple modules: real-time data retrieval, feature extraction, label refinement, data partition, data processing, ML algorithms, parameter selection, ML models, and classification
- Integrated various stages of the anomaly detection process
- Detected BGP anomalies based on routing records collected worldwide from major Internet exchange points
- Facilitated creating new machine learning models based on historical BGP anomalous events
- Developed a web-based version for real-time anomaly detection and off-line classification

Data Analyst | Part-time

EVO-IN-MOTION Technology

May 2021–Sept. 2021

Richmond, BC

- Analyzed data from circuit simulations and experiments

Technical Documentation Specialist | Part-time

EVO-IN-MOTION Technology

May 2020–Aug. 2020

Richmond, BC

- Designed and wrote the lab manual related to DC experiments (analog circuits)

Research Assistant (Advisor: Prof. Peter Kennedy)

Tyndall National Institute

Oct. 2011–Jan. 2015

Cork, Ireland

- Designed nonlinearity-tolerant requantizer architectures for fractional- N frequency synthesizers

Electrical Engineer | Internship

Dell EMC

May 2010–Aug. 2010

Cork, Ireland

- Supplied details of failure return to the suppliers and involved in customer service

TEACHING EXPERIENCE

Teaching Assistant

Faculty of Applied Sciences, Simon Fraser University

Sept. 2015–Apr. 2022

Burnaby, BC

- **[ENSC 427/894 Communication Networks](#)**, 6 terms (undergraduate and graduate levels)
 - Delivered lectures; Designed and graded assignments and exams; Helped students with their projects using ns-3 and Riverbed Modeler
- **[ENSC 220 Electronic Circuits I](#)**, 4 terms (undergraduate level)
 - Held lab sessions with both practical exercises and LTspice simulations: Kirchhoff's voltage and current laws, operational amplifiers, and RLC circuits; Graded assignments and exams
- **[ENSC 120 Introduction to Electronics Laboratory Instruments Operation and Measurement Techniques](#)**, 2 terms (undergraduate level)
 - Held lab sessions for operating electronics laboratory instrumentation such as linear power supply, digital multi-meter, function generator, and oscilloscope; Graded exams
- **[ENSC 252 Fundamentals of Digital Logic and Design](#)**, 2 terms (undergraduate level)
 - Held lab sessions for designing digital systems using VHDL on a FPGA; Proctored exams
- **[ENSC 180 Introduction to Engineering Analysis](#)**, 1 term (undergraduate level)
 - Helped design a lab assignment using MATLAB: Red Bull Stratos Jump; Proctored exams

Teaching Assistant

IEEE SMC Society Cybernetics Summer School

June 12, 2021

Tokyo, Japan (virtual)

- TA for Lecture 4: Data mining and machine learning for detecting traffic anomalies and intrusions
- Designed and presented a demo of anomaly detection (Slammer worm) with Python on Colab

AWARDS

- Graduate Fellowship Award, SFU *Fall 2017, Fall 2019*
- Faculty of Applied Sciences Graduate Fellowship Award, SFU *Summer 2016, Fall 2016*
- Travel and Minor Research Award, SFU *Summer 2016*

EXTERNAL SERVICE AND EVIDENCE OF IMPACT

Secretary *Feb. 2022–Present*
Membership Development Committee, IEEE Canada

Treasurer *Jan. 2018–Present*
IEEE Circuits and Systems Society joint Chapter of the Vancouver/Victoria Sections

Chair *Sept. 2020–Oct. 2021*
IEEE SFU Student Branch

Secretary *Sept. 2019–Sept. 2020*
IEEE SFU Student Branch

Technical Program Committee Membership

- IEEE International Conference on High Performance Computing and Communications: Member ([HPCC-2022](#)); Member and Session Chair ([HPCC-2020](#))
- IEEE International Conference on Cyber, Physical and Social Computing: Member and Publicity Chair ([CPSCom-2022](#)); Member and Session Chair ([CPSCom-2020](#))

Reviewer

- IEEE Journal on Selected Areas in Communications (J-SAC) (2022); Computers & Security (2022); IEEE Transactions on Neural Networks and Learning Systems (2021, 2022); Neural Networks (2020–2022); IEEE International Conference on Systems, Man, and Cybernetics (2020–2022); Concurrency and Computation: Practice and Experience (2021); IEEE Transactions on Emerging Topics in Computational Intelligence (2019, 2021); IEEE Access (2019, 2020)
