EDUCATION

Ph.D. Engineering Science *Sept. 2015–Apr. 2022*
Simon Fraser University, Canada
- Dissertation: Machine Learning for Classifying Anomalies and Intrusions in Communication Networks

M.Eng.Sc. (thesis-based) Electrical and Electronic Engineering *Feb. 2013–Sept. 2015*
University College Cork, Ireland

M.Eng.Sc. (course-based) Microelectronic Engineering *Sept. 2011–Feb. 2013*
University College Cork, Ireland

B.E. (Hons.) Electrical and Electronic Engineering *Sept. 2009–Sept. 2011*
University College Cork, Ireland

B.E. Microelectronics *Sept. 2007–Sept. 2009*
Guilin University of Electronic Technology, China

TECHNICAL SKILLS

Programming Languages: Python, MATLAB, MySQL, JavaScript, Octave, C#, LaTeX

Machine Learning Libraries and Data Science Tools: PyTorch, Keras, Scikit-learn, NumPy, SciPy, Pandas, Matplotlib, Google Colab, Weka

Web Application Development: Flask, AWS Elastic Beanstalk

Certification: Cisco Certified Network Associate (CCNA)

RESEARCH AND WORK EXPERIENCE

Assistant Professor *Jan. 2023–Present*
Department of Computer Science, New York Institute of Technology Vancouver, BC
- **Teaching Responsibilities for the Master of Science in Cybersecurity (M.S.-Cybersecurity) Program**
  - Core courses: **CSCI 651** Algorithm Concepts; **INCS 615** Advanced Network and Internet Security; **INCS 775** Data Center Security; **INCS 870** Project I
  - Elective course: **CSCI 690** Computer Networks

- **Curriculum Development for Online Education**
  - **CSCI 760** Database Systems for the New York Campus

- **Research Involvement**
  - Network intrusion detection systems (NIDS): Developing a real-time machine learning (ML) system for the detection of network anomalies; Focusing on fast ML algorithms in cybersecurity
  - Brain-computer interfaces (BCI): Analyzing electroencephalogram (EEG) signals and developing ML classification models for BCI data

Postdoctoral Fellow   *June 2022–Dec. 2022*

Faculty of Applied Sciences, Simon Fraser University   Burnaby, BC

- Led the project for developing new machine learning algorithms based on echo state networks
- Explored applications of graph neural networks based on network topologies

Research Assistant *(Advisor: Prof. Ljiljana Trajković)*   *Sept. 2015–Apr. 2022*

Faculty of Applied Sciences, Simon Fraser University   Burnaby, BC

- **Applications of Machine Learning Techniques for Classifying Network Anomalies**
  - Processed the raw network data: BGP data from RIPE and Route Views
  - Analyzed and implemented various ML algorithms as well as employing feature selection
  - Performed experiments (cross-validation and testing) using a supercomputer managed by Compute Canada

- **Development of Novel Machine Learning Algorithms: VFBLS, VCFBLS**
  - Developed two fast BLS-based algorithms: variable features BLS algorithms without and with cascades
  - Developed generalized models based on various subsets of input data based on selected features and expanded the network structure

- **Development of Tool for Detecting Network Anomalies: BGPGuard**
  - The tool consists of multiple modules: real-time data retrieval, feature extraction, label refinement, data partition, data processing, ML algorithms, parameter selection, ML models, and classification
  - Integrated various stages of the anomaly detection process
  - Detected BGP anomalies based on routing records collected worldwide from major Internet exchange points
  - Facilitated creating new machine learning models based on historical BGP anomalous events

Data Analyst | Part-time   *May 2021–Sept. 2021*

EVO-IN-MOTION Technology   Richmond, BC

- Analyzed data from circuit simulations and experiments

Research Assistant *(Advisor: Prof. Peter Kennedy)*   *Oct. 2011–Jan. 2015*

Tyndall National Institute   Cork, Ireland

- Designed nonlinearity-tolerant requantizer architectures for fractional-N frequency synthesizers

Electrical Engineer | Internship   *May 2010–Aug. 2010*

Dell EMC   Cork, Ireland

- Supplied details of failure return to the suppliers and involved in customer service

TEACHING EXPERIENCE

Teaching Assistant   *Sept. 2015–Apr. 2022*

Faculty of Applied Sciences, Simon Fraser University   Burnaby, BC

- **ENSC 427/894 Communication Networks**, 6 terms (undergraduate and graduate levels)
  - Delivered lectures as needed; Designed and graded assignments and exams; Guided students with their projects using ns-3 and Riverbed Modeler

- **ENSC 220 Electric Circuits I**, 4 terms (undergraduate level)
  - Held lab sessions with both practical exercises and LTspice simulations: Kirchhoff's voltage and current laws, operational amplifiers, and RLC circuits; Graded assignments and exams

- **ENSC 120 Introduction to Electronics Laboratory Instruments Operation and Measurement Techniques**, 2 terms (undergraduate level)

- Held lab sessions for operating electronics laboratory instrumentation such as linear power supply, digital multi-meter, function generator, and oscilloscope; Graded exams

- **ENSC 252** **Fundamentals of Digital Logic and Design**, 2 terms (undergraduate level)
  - Held lab sessions for designing digital systems using VHDL on FPGA; Proctored exams

- **ENSC 180** **Introduction to Engineering Analysis**, 1 term (undergraduate level)
  - Helped design a lab assignment using MATLAB: Simulation for Red Bull Stratos Jump; Proctored exams

Teaching Assistant   *June 12, 2021*
IEEE SMC Society Summer School   Tokyo, Japan (virtual)
- TA for Lecture 4: Data mining and machine learning for detecting traffic anomalies and intrusions
- Designed and presented a demo of anomaly detection (Slammer worm) with Python on Colab

AWARDS

- IEEE Outstanding Leadership Award   *Dec. 2022*
  - Publicity Chair of the 2022 IEEE International Conference on Digital Twin as a part of the 2022 IEEE Smart World Congress
- Graduate Fellowship Award, SFU   *Fall 2017, Fall 2019*
- Faculty of Applied Sciences Graduate Fellowship Award, SFU   *Summer 2016, Fall 2016*
- Travel and Minor Research Award, SFU   *Summer 2016*

EXTERNAL SERVICE AND EVIDENCE OF IMPACT

Secretary   *Feb. 2022–Present*
Membership Development Committee, IEEE Canada

Secretary   *Jan. 2024–Present*
IEEE Vancouver Section

Chair/Treasurer   *June 2023–Present/ Jan. 2018–June 2023*
IEEE Circuits and Systems Society joint Chapter of the Vancouver/Victoria Sections

Counselor   *July 2023–Present*
IEEE NYIT-Vancouver Student Branch

Jury Member and Mentor   *Apr. 2023*
Virtual BR41N.IO Hackathon, Spring School 2023
- Assessed various projects: data analysis, gaming, and programming/art
- Mentored NYIT teams:
  - Data Analysis Project: Focused on EEG analysis, this project aimed to filter noise from EEG data, partition the data, and develop various machine learning models to classify brainwave signals
  - Gaming Project: Developed using Unity 3D and the Unicorn C# API, this project features a game that leverages P300 signals reflecting the player's attention to specific stimuli to control the music, creating a unique gaming experience

Chair/ Secretary   *Sept. 2020–Oct. 2021/ Sept. 2019–Sept. 2020*
 IEEE SFU Student Branch

Technical Program Committee Membership
- IEEE International Conference on High Performance Computing and Communications: Member (*HPCC-2022*); Member and Session Chair (*HPCC-2020*)

- IEEE International Conference on Cyber, Physical and Social Computing: Member and Publicity Chair (*CPSCom-2022*); Member and Session Chair (*CPSCom-2020*)
- International Conference on E-Business and Internet: Member (*ICEBI 2022*)
- International Conference on Intelligent Sensing and Industrial Automation (*ISIA 2023*)

Reviewer
- IEEE Journal on Selected Areas in Communications (J-SAC) (*2022*); Computers & Security (*2022*); IEEE Transactions on Neural Networks and Learning Systems (*2021, 2022*); Neural Networks (*2020–2022*); IEEE International Symposium on Circuits and Systems *(2022)*; IEEE International Conference on Systems, Man, and Cybernetics (*2020–2024*); Concurrency and Computation: Practice and Experience (*2021*); IEEE Transactions on Emerging Topics in Computational Intelligence (*2019, 2021*); IEEE Access (*2019, 2020*)
